DETAILED ACTION III

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in-

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or

(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

2. Claims 1,2 and 7-9 are rejected under 35 U.S.C. 102(e) as being anticipated by Good et al. Good et al discloses a connecting device for connecting a connector by mating to an electronic card 52, the device comprising a card support 116 with locating pins 124, a frame 54, a movable member 50 carrying a spring 106 and an engaging member 94, said movable member further comprising a clamp 88,72 and an actuation assembly 78,74,72.

Regarding claim 2, the card support of Good et al. comprises electrical conductors 90 associated with the mating connector 58.

Regarding claim 7, Good et al. disclose the clamp member having a base member 72 and a holding member 102, wherein said holding member is restrained by fasteners 74.

Art Unit: 2833

Regarding claim 8, Good et al. disclose the engaging member having a surface (at 94) for engagement with a surface of the card 52 and forcing the card toward the support 116.

Regarding claim 9, the spring of Good et al. exerts a force through the engaging member 94 in excess of the force exerted on the connector.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 3 and 4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Goode et al. in view of Kaiser et al. Goode et al. do not disclose the actuator comprising a toggle.

However, Kaiser et al disclose an actuator having an arm that acts as a toggle (see col. 5, lines 18-20). Therefore, it would have been obvious to one of ordinary skill to modify the connecting/disconnecting device of Good et al by having the actuator further comprise a toggle assembly to allow the forces to be exerted on the arm as taught by Kaiser et al.

Allowable Subject Matter

5. Claims 5 and 6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 2833

6. Claims 10-17 are allowed.

Response to Arguments

7. Applicant's arguments filed September 24, 2003 have been fully considered but they are not persuasive. In response to applicant's argument that the frame 54 of Good et al. is not "fixedly disposed relative to the card support card", the examiner draws applicant's attention to fig. 2 which clearly shows the frame being "fixedly disposed *relative* to the card support card". In response to applicant's argument that "Good et al. does not carry a biasing spring which biases the engaging member". The examiner disagrees. Good et al. disclose the movable member 50 "carrying" biasing spring 106 which biases the engaging member 94 towards the card support (see col. 6, lines 1-10 and 40-43).

Conclusion

8. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however,

Art Unit: 2833

will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

9. Any inquiry concerning this communication or earlier communication from the examiner should be directed to Brigitte R. Hammond whose telephone number is (703) 305-0032.

The examiner can normally be reached on Monday - Thursday from 7:30 A.M. to 5:00 P.M. The examiner can also be reached on alternate Fridays.
